

Main page showing register functions with validations. If already have an account, click the upper right link to directly login.

After logging in, the user should see a list of products (up to 6) that they can purchase. Each product has a picture, a name, a price, and an “add to cart” button.

“Add to cart” button should add the item to the shopping cart.

Shopping cart should display the items added to the cart, with quantity and total price.

For each item added in the shopping cart, user should be able to remove that item from the cart.

On Shopping Cart page, user can go back to the main shipping page to continue shopping, or “place the order” to purchase the items in the cart.

A successful order page should display.
